

# **Paradise Irrigation District**

# AGENDA

#### Paradise Irrigation District Finance Committee Meeting 6332 Clark Road, Paradise, CA 95969

### TUESDAY, NOVEMBER 15, 2022 – 10:30 AM

Committee Members: Board of Directors - Alan Hinman & Bob Matthews PID Staff – Brett Goodlin, Finance & Accounting Manager, Tom Lando, District Manager and Mickey Rich, Assistant District Manager Public Members – Gary Ledbetter and Steve Oehler

- The Board of Directors is committed to making its meetings accessible to all citizens. Any persons requiring a special accommodation to participate, is requested to contact the District Secretary at 530-877-4971, extension 2039 at least 72 hours in advance of the meeting.
- To participate in the meeting remotely: Via Zoom Meeting: <u>https://us02web.zoom.us/i/88192841237</u> Telephone: +1 669 900 6833 US (San Jose) Meeting ID: 881 9284 1237 To improve participation during the meeting, we will be accepting public comments from Zoom Meeting participants during the meeting. The Board cannot take action on any matter not on the agenda. Public comments specific to an agenda item will be read directly after the agenda item and before the Board votes on an item.

Via Email or Telephone: Public comment will be accepted by email with the subject line PUBLIC COMMENT ITEM NO. \_\_\_\_\_ to <u>gborrayo@paradiseirrigation.com</u> or telephone (530) 876-2039 prior to 9:00 a.m. on the day of the meeting.

#### 1. Opening

#### 2. Public Participation

This is the time for members of the audience to present items not on the agenda. No action can be taken on these items, but they may be placed on future agendas for consideration. Comments should be limited to a maximum of five minutes duration. If more time is needed, communication may be submitted in writing to committee members, or placed on the agenda for a future committee meeting.

- 3. **PID Capacity Fee**: Review and discussion regarding the Capacity Fee Study prepared by Bartle Wells Associates and evaluation of a capacity fee increase.
- 4. **Fiscal Year 2022-2023 Budget Review** (Brett Goodlin): Verbal update of revenues and expenditures through 10/31/2022.
- 5. Accounting information regarding grant cost recovery tracking (Brett Goodlin | Nicole Maddox)
- 6. Adjournment

\*Paradise Irrigation District 2020 Urban Water Management Plan ES Table 1

\*\*Based on American Water Works Association (AWWA) standard ratios

\*\*Based on average demand of 325 gallons per day per meter equivalent

"Discontinued Service" meters will not pay a monthly service charge, but the service line to the meter will not be replaced if it is found to leak, or if the District replaces the mainline that previously served the property.

Meter installation and relocation charges shall be fixed from time to time by the Board and be available upon request at the District business office.

## 6.12.5 Capacity Fee -

A capacity fee has been established and charged to customers to provide funds to build certain facilities needed for growth within the District. The capacity fee calculation takes into consideration both the value of the existing system, as well as anticipated alternative water supplies needed to supply new connections. A capacity fee schedule for new meters and changes in meter size shall be fixed from time to time by the Board and be available upon request at the District business office.

The capacity fee may be financed by the owner of the property through the District at fixed rate set to the prime rate of the District's Bank plus 2%, for a maximum term of 7 years, with an option by District to call upon any sale, transfer, or assignment.

## 6.12.6 Construction/Hydrant Meters -

Construction/Hydrant meters will be available, unless restricted due to water supply conditions, as provided in this manual.

## 6.12.7 Building/Construction Meters -

Building/Construction meters for new construction shall be the same as any other regular active meter except that they shall be eligible for the lowest "service" charge for the first six months or until the building is transferred or occupied.

## 6.12.8 Estimated Meter Readings -

Bills for service will be based on an estimate if a meter fails to register the volume of water consumed or cannot be read. In estimating consumption, due consideration will be given to fluctuations in usage caused by seasonal changes or known service interruption. Where a meter cannot be read without undue difficulty because of obstruction, the customer will be notified and requested to correct the condition.

## 6.13 CUSTOMER PRESSURE REGULATING & RELIEF VALVE RESPONSIBILITY

It shall be the responsibility of each water service customer to install pressure regulating and pressure relief valves within the customer's private water pipe system in accordance with the Health and Safety Code and applicable building codes.

# Capital Improvement Plan Development Memorandum

Date: January 6, 2022

Prepared by: Cindy Bertsch, PE Colleen Boak, PE Sami Kader, PE Erik Ma, EIT Esmeralda Diego, EIT

Remaining Value	5
Annual Operations and Maintenance Costs	5
Annual Depreciation	5
Capital Project List	6
Equipment Replacement	6
Detailed Asset Information	6
Appendix A - Detailed Asset Information	7

# **Project Background and Purpose**

Paradise Irrigation District (PID) requested a list of owned assets including the replacement and remaining values to support an ongoing Financial Analysis for the District. This memorandum documents how the asset list was created and how replacement and remaining values were assigned.

# Asset List

# Assets from GIS Data

The pre-fire AutoCAD distribution map that was maintained by PID was converted to GIS by WebSoft Developers following the 2018 fire and has been maintained by Water Works Engineers in coordination with WebSoft Developers. The data used as the basis for the pipes, valves, and services were exported from the PID distribution system GIS files on November 1, 2021.

#### Pipes

The PID GIS pipe data included pipe material, main length, pipe diameter, year of installation, and main status for the majority of the distribution system. The following assumptions were made about the pipe data.

- 1. Privately owned pipes are assumed to be the most common pipe material, steel.
- 2. Privately owned pipes have an assumed diameter of 1.5 inch, which was the most common size on the Private Pipeline Summary provided by PID.
- 3. If a pipe is abandoned or removed, then it is assumed to have zero value.
- 4. Any pipe segment under 1 foot in length is assumed to have zero value.
- 5. Main lengths were rounded to the nearest foot.
- 6. Approximately 30 feet of pipe with no material identifier was assumed to be the most abundant type of pipe material, steel.
- 7. If the main installation date was missing from the data, the mean of all the main installation dates of that particular material was used to calculate the remaining value.
- 8. The 2008 42 inch HDPE raw water pipeline is from the asset data spreadsheet provided by PID
- 9. The 1993 Magalia Reservoir Bypass Pipeline and Diversion Dam drawings by Harlan Tait and Associates were provided by PID.

#### Valves

The PID GIS valve data included valve type, address, year of installation, and intersection water main data for most of the valves. The following assumptions were made about the valve data.

- 1. GIS data, created from the CAD files, had limited valve size information. As such, valve sizes were also assumed based on input from PID operations or based on the water main the valve intersected.
- Blowoff valves were confirmed by PID Operation to mostly be 2" valves with only 5 percent being 1" valves.

- Air Relief valves were confirmed by PID Operations to be mostly 2" valves with 20 percent being 1" valves.
- 4. Per PID, hydrant valves are assumed to not be PID assets and were assigned no value.
- 5. For all other valve types, where size information was not available, the size of the valve was assumed to be the same as the size of the water main which it intersects. Where no intersecting water main information was available, the size was assumed to be equal to the most common size for that valve type.
- 6. Where no installation year of a valve was available, the installation year was assumed to be the same as that of the water main which it intersects. Where no intersecting water main information was available, the installation year was assumed to be the average install year for that valve type.
- 7. A valve with the CAD label "Buried" is assumed to be a gate valve.
- 8. The two "Tie" valves with no information are not included.

#### **Service Laterals and Backflow Preventers**

After the 2018 Camp Fire, PID's service laterals required significant replacement efforts. The service lateral count is assumed as the sum of the surviving service laterals and the number of meters PID plans to install by the beginning of the year 2023. Backflow preventers are included in the water services category. Although some backflow preventers are customer owned, the majority are assumed to be owned by PID. All services require a backflow preventer. For simplicity, it is assumed that the new services will be installed in 2021 and the surviving services were installed in 2000.

## **Assets from Asset Master Spreadsheet**

The PID Fixed Asset Master excel spreadsheet dated June 2021 was provided by PID on November 10, 2021. It was used to estimate the value of PID's Magalia and Paradise dams, corporation yard and office buildings, land, equipment, Pump Station 2, and wells. Additionally, some water treatment plant costs were from the provided asset data that were labeled "water treatment plant". The Magalia bypass pipeline is included in the pipe cost. The lifespans and value of each asset was provided. The following assumptions were made about the equipment and building data.

- 1. PID does not own any roads, so they are not considered PID assets.
- 2. Software and training are not PID assets.
- 3. As PID does not maintain the recreation facilities, they will not be counted as PID assets.
- 4. Surveys and reports conducted in the past are not PID assets.
- 5. Land purchased is a PID asset, however structures on PID land that are not maintained by PID are not considered assets
- 6. Piping and valves are not included because they were accounted for in the GIS data except for the Magalia Bypass Pipe.

# **Assets from Other PID Documentation**

#### **Pump Station**

The Pump Station 2 building information was from the August 1967 Booster Pump Station plans prepared by Dean S. Kingman Consulting Engineers. Pump Station 2 pump information was based on the PID Fixed

Asset Master excel spreadsheet. The engine pump installation date was based on information from Bill Taylor at the November 18, 2021 workshop. The Tesla system information was from the purchase contract.

The Raw Pump Station building, pump horsepower, and raw water tank was based on the March 1996 Raw Water Pumping Station drawings by SPH Associates.

#### **Reservoir and Tanks**

The reservoir and tanks information were based on the 2020 Urban Water Management Plan. The Raw Water Tank information was based on an estimated volume assumed from Google maps.

#### Water Treatment Plant

The Water Treatment Plant drawings dated March 1993 and prepared by Brown and Caldwell were used as the basis for the Water Treatment Plant evaluation. PID staff including Blaine Allen, District Engineer and Bill Taylor, Treatment Plant Operations Supervisor, provided input on the treatment plant components at a 11/18/2021 review workshop. The Tesla system information was from the purchase contract.

#### Land

Two additional PID owned parcels were not included in previously mentioned documentation. Parcels 053-150-198-000 and 053-150-199-00, 6352 and 6350 Clark Road respectively, border the PID Corporation Yard and are owned by PID. The value of both the land and improvements on the land were determined from the Parcel Search (Assessed Value Lookup) provided on the Butte County municipal website. Both properties were assessed in 2021.

# **Total and Remaining Asset Values**

Each asset had both a total value and remaining value assigned to it determine the combined inventory of PID.

#### **Total Value**

Total value is comprised of the replacement cost in today's dollars.

#### **Pipes**

The total value of the pipe was calculated by multiplying main length by diameter of pipe and a cost per linear foot.

<u>Valves</u>

Valve cost was determined based on unit cost or a cost per inch of valve size.

#### Services and Backflow Preventers

Services and backflow preventers were based on a unit cost per service. The unit cost was based on recent construction data.

#### Tanks and Reservoirs

Storage costs were based on a cost per gallon basis.

#### Pump Station

Pump station costs were from PID's asset list.

#### Buildings, Equipment, Dams, and Well

Value was based on values provided in PID's asset list with the exception of the buildings on 6352 and 6350 Clark Road Paradise CA, whose values were determined from the 2021 assessment by Diane Brown, Assessor. For these two properties the total value of the buildings was determined from the 2021 assessment Improvement Value.

#### Water Treatment Plant

Treatment components were based on a unit price.

#### Land

Values were based on values provided in PID's asset list with the exception of the land on 6352 and 6350 Clark Road Paradise CA, whose values were determined from the 2021 assessment land value.

#### **Remaining Value**

If the remaining value was not provided by PID, then the remaining value factored in the assets' date of installation and average design life for each component. The following equation was used.

$$\frac{Design \, Life - \, (Current \, Year - Installation \, Year)}{Design \, Life} x \, Total \, Value = Remaining \, Value$$

If the age of the asset in the field exceeded its expected design life, then it has zero remaining value.

# **Annual Operations and Maintenance Costs**

The annual operations and maintenance costs were assumed at 5 percent per year of the total cost.

# **Annual Depreciation**

Annual depreciation was calculated based on the method used in PID's Asset List. The following equation was used to calculate annual depreciation for 5 years in the future from the Current Year in the Assumptions sheet.

$$\frac{Original \ Cost}{Life \ span} = Annual \ Depreciation$$

If an asset was past its lifespan, annual depreciation is zero dollars. No annual depreciation was calculated for land and planned projects.

# **Capital Project List**

PID has identified a list of potential capital projects and their estimated cost. Most of the projects are listed on the PID FY 20221.22 Budget Capital Projects Summary. The annual operational and maintenance costs were assumed at 5 percent per year.

# **Equipment Replacement**

Equipment refers to both vehicles and miscellaneous equipment provided in PID's Asset List. Equipment replacement costs were determined based off the PID Asset List's lifespan and the original cost of the equipment. Any equipment that exceeded its lifespan would be assumed to be replaced in the year after the Current Year on the assumptions sheet. The cost of the equipment replacement is determined based on the original cost + additional inflation costs according to the formula shown below.

 $Original Cost \ x \ Inflation \ Rate^{Year \ Z-Year \ Aquired} = Replacement \ Cost \ in \ Year \ Z$ 

Inflation was assumed to be at a constant 3% increase per year. Inflation rate can be changed on the Assumptions Sheet under Current Year. A summary of a focused group of critical vehicles and equipment identified by PID for upcoming replacement is shown in Appendix A. A full list of vehicle and equipment assets can be found in the Excel-based analysis spreadsheet.

# **Detailed Asset Information**

The detailed asset information is included in Appendix A. Values highlighted in yellow on the Assumptions page are linked to the calculation paged for easy list modifications on the Assumptions page.

# **Appendix A - Detailed Asset Information**

#### Summary

•						Dep	reciation per Y	ear	
			Annual O&M						
	Total Value	Remaining Value	Percentage	Annual O&M	2023	2024	2025	2026	2027
Pipes inc. Magalia Bypass Pipe	\$85,676,946	\$26,242,320	5%	\$4,284,000	\$630,596	\$622,272	\$621,091	\$615,539	\$609,855
Valves	\$6,458,000	\$2,096,000	5%	\$323,000	\$92,432	\$88,424	\$88,196	\$87,368	\$86,210
Services and Backflow Preventers	\$23,800,000	\$20,299,429	5%	\$1,190,000	\$800,571	\$800,571	\$800,571	\$800,571	\$800,571
Water Storage (Reservoir and Tanks) inc. Raw Water Tank	\$23,500,000	\$5,166,667	5%	\$1,175,000	\$837,500	\$837,500	\$837,500	\$837,500	\$837,500
Raw Water Pump Station and Pump Station 2	\$2,131,000	\$889,600	5%	\$107,000	\$41,728	\$41,728	\$41,728	\$41,728	\$41,728
Buildings	\$3,837,503	\$2,957,877	5%	\$192,000	\$98,199	\$98,199	\$98,199	\$98,199	\$98,199
Land	\$2,192,034	\$2,192,034				I	Not Applicable		
Vehicles and Equipment	\$2,301,578	\$424,204	5%	\$115,000	\$74,256	\$74,214	\$68,444	\$64,166	\$56,146

#### Planned Improvement Projects (not including maintenance or studies)

Project Number	Project Name	Description	Approx. Cost (\$M)	Annual O&M Percentage	O&M cost
		Pump station at the WTP to direct feed Zone A through a new Zone			
1	Zone A Pump Station and Pipeline Project	A Transmission Main. Provides redundant feed to the entire distribution system (currently the system relies entirely on the 42" Transmission Main, a potential single point of failure that could	\$4.58	5%	\$229,000
		interrupt water supply completely if it was not functional.			
2	Pump Station 2 Upgrade Project	Upgrade of piping and valves at Pump Station 2 to allow back feed of lower zones from A Zone.	\$0.40	5%	\$20,000
3	WTP Generator Replacement and Switchgear Upgrade Project	Replacement of stand-by generator and associated switchgear	\$1.00	5%	\$50,000
4	42" Raw Water Pipeline Replacement Project	Replace above grade 42" Creek Crossing with buried alignment. Existing creek crossing is a seismic concern.	\$0.38	5%	\$18,750
5	Sodium Hypochlorite Storage and Feed System Upgrade Project	New hypochlorite storage and feed system coordinated with other chemicals	\$0.80	5%	\$40,000
6	WTP Solar Project	Charge battery system, offset summer power usage	\$0.50	5%	\$25,000
7	36" Raw Water Line Project	Approximately 14,000 feet of raw water line directly connecting Paradise Lake to the WTP to improve reliability of raw water supply system	\$12.00	5%	\$600,000
8	Reservoir A Tank 2 Project	Addition of a second steel reservoir adjacent to the existing Reservoir A. Existing Reservoir A is 1-MG and is the only Reservoir which gravity feeds A Zone for fire protection and water supply. A second tank will add reliability and provide additional needed fire storage for A-Zone. In conjunction with the Pump Station 2 Upgrade Project, this reservoir would also serve all lower zones.	\$4.00	5%	\$200,000
9	Backwash Equalization Tank Project	Add second Backwash Equalization Tank at WTP and replace existing Backwash Equalization Tank. Existing Backwash EQ tank is corroded and approaching failure. Because there is only one tank, it has not been possible to take it out of service for recoating/maintenance. A second tank will allow for long-term maintenance.	\$3.00	5%	\$150,000
10	Backwash Recycled System Project	Add backwash recycle pump and control system to reduce the amount of backwash waste and capture more of the raw water as treated water. Requires a retaining wall to make a flat area	\$1.30	5%	\$65,000
11	Corporation Yard and Office Solar Project	Add solar to the corporation yard and office area. Provide covered parking, offset summer power usage.	\$1.00	5%	\$50,000
12	Original WTP Demolition	Demolish original plant clarifier and retrofit old ops building	\$0.50	0%	\$0
13	Supply Storage	Provide covered storage of fittings, pipe, and equipment.	\$0.50	5%	\$25,000
14	Corp Yard Paving	Add pavement to the area at the corporation yard to replace the current gravel	\$0.50	5%	\$25,000
15	Storage Tank Upgrades	Tanks C, D & E lead abatement from exterior coating, internal and exterior coating of tanks. Cathodic Protection system for A tank and Raw Water tank	\$0.75	5%	\$37,500
16	Plant SCADA & Instrumentation Upgrades	Replacement of plant SCADA PCs & Instrumentation upgrades at the WTP	\$0.60	5%	\$30,000
17	Cathodic Protection System evaluation	Evaluation of the out of service cathodic protection system (CPS) at the treatment plant, and the CPS for the 2.5 mile 42-inch transmission pipeline to town.	\$0.30	5%	\$15,000
18	Treatment Plant Pavement Rehabilitation	Rehabilitate the paving at the Treatment Plant	\$0.25	5%	\$12,250
19	Gabion Wall	Construction of a gabion wall to reinforce the Magalia Dam northern	\$0.20	5%	\$10,000
20	Community Power Resiliency Allocation	Support energy resilience for critical facilities during power outages. Development of procurement documents underway for contracted services to install solar equipment at PID tank sites.	\$0.27	5%	\$13,460
21	All Terrain Telehandler	Acquire a telehandler	\$0.05	5%	\$2,500

#### Planned Improvement Projects (not including maintenance or studies)

Project Number	Project Name	Description	Approx. Cost (\$M)	Annual O&M Percentage	O&M cost
22	Lake Level Monitor - Paradise Lake	Add a lake level monitor for Paradise Lake	\$0.05	5%	\$2,500
23	Ball Valve Replacement - Paradise Lake	Replace Paradise Lake ball valve	\$0.25	5%	\$12,500
24	Bleach Tank Relocation	Relocate tanks	\$0.60	5%	\$30,000
		Total	\$33,769,200		\$1,663,460

Notes:

1. Projects not included because they are considered maintenance or planning reports: clarifier media, EQ tank PDR

No.

	Comment Log							
No.	Date	From	Question/ Action item	WWE Response				
1	12.24.21	PID	Add Land as a PID asset from the PID provided Asset List	Added				
2	12.24.21	PID	Addition of replacement dates and costs for both equipment and vehicles.	Included replacement costs as a 5 year look ahead on Vehicles + Equipment Sheet				
3	12.24.21	PID	Revision on PID asset list: "Correct Pump Station 22" to "Pump Station 2"	Changed				
4	12.24.21	PID	Add depreciation values for all PID assets	Added				
5	12.24.21	PID	Add parcels and improvements for parcels 053-150-198-000 and 053-150-199-00 adjacent to PID corpyard	Added				
6	01.06.21	PID	Add an additional select group of vehicles and equipment to the memo as well as a note that these are just a portion of the vehicles and equipment so that no one thinks it is inclusive. Also please add the overall data that you had on the other sheet for	Included a vehicles and Equipment Replacement table on memo and in PID_Asset Excel file with the selected vehicles and equipment, and included a note in the Memo. New tables were				

vehicles and equipment that incorporated the total cost of all

equipment

included in the memo that summarized the overall replacement cost projection and

depreciation for vehicles and equipment
