Request to Discontinue Water Service

As the legal owner of the property listed below, I direct Paradise Irrigation District (District) to discontinue my water service. I understand that:

1. District will remove the meter that currently serves my property.
2. When reactivating service to this parcel I will need to apply for a new meter order and will be subject to the same policies, procedures, and costs as a new meter request.
3. The District will not reserve water capacity for future water use on this property.
4. If water is reactivated within three (3) years of disconnect, and after completion of an engineering review confirming system capacity sufficient to serve the request, water may be reconnected once monthly ready-to-serve rate multiplied by the months since disconnect are paid plus interest based on the District's bank interest rate plus two (2) percent.
5. District will send a final billing during the regular billing cycle for a Discontinued Service.
6. District is not responsible for any loss or damages associated with the property due to discontinuance of service.
7. District reserves the right to review its policy and adopt changes as necessary.
8. These conditions are applicable to future owners of the property. I understand that it is my responsibility to disclose this to potential buyers.

I have read and understand the above information and request to have my meter service discontinued.
